PREMIUM BACKPACKING

## DYNAMIC COMFORT

The FreeFloat A3 system allows the hipbelt, shoulder harnesses, and lower backpanel to adapt and conform to your body's unique shape. Patented FreeFloat hipbelt system and auto-rotating shoulder harnesses flex and adapt to your body's natural walking movements, delivering unrivaled comfort.

## ADAPTABLE FIT SYSTEM

The ultimate in custom pack fit and available in three adjustable torso sizes, with fit ranges that overlap with one another, allowing you to size up or down to accommodate a smaller or larger body shape. The hipbelt padding also fully adjusts on all pack sizes to deliver refreshing, all-day comfort.

## AIRCUSHION BACKPANEL

The AirCushion backpanel is made from proprietary mesh with a 3D structure consisting of over 90% open-air. This next-generation padding provides true on-the-back breathability, eliminates pressure points, and has moisture-wicking cooling benefits.

## WHAT'S

## NEW

- Fully reimagined FreeFloat™ A3 Suspension with a dynamic hipbelt and rotating shoulder harness
- New Adaptable Fit System with fully adjustable harnesses and hipbelts, and available in three torso sizes to accommodate not only different back lengths but also different body shapes. This new fit approach allows us to eliminate the component accessory system, without compromising the pinnacle of customizable pack fit.
- Fully adjustable hipbelts with enlarged pockets to fit larger phones and GPS units
- AirCushion backpanel made from a 3D mesh providing over 90% open-air, providing cool breathability and quick-dry padding
- Polygiene® Stays Fresh treated shoulder harness, hipbelts, and backpanel (an odor control treatment that inhibits the growth of odor-causing bacteria)
- New and improved ComfortGrip lumbar panel to properly locate and support the weight onto your back
- Sidekick daypack removed to help maintain the competitive price point
- Lighter and more accessible SideWinder water bottle holster with stretch-mesh
- Accessory attachment system located at easy-to-access hip location for bear spray holster's or accessory pouches
- Revised top pocket organization with quick access accessory pocket addition
- SpeedClip hydration attachment system added for compatibility with Gregory's 3D Hydro reservoirs
- Nano Connect daypack attachment system added (Nano daypack not included)
- New foamless backpanel, reducing plastic usage to maintain same weight as previous generation

# FREE FLOAT A3

MOVES WITH YOU

**Flexes and adapts to the natural walking motion of your hips and upper body to deliver a new standard in trail comfort.**

## Perimeter Frame Architecture

An alloy perimeter frame surrounds the pack's hipbelt and harness, enabling a dynamic support system to move freely while providing stable load management. A fiberglass cross support positioned at the center of the frame maintains the pack shape, so the pack's weight stays close to your center of gravity.

## Polygiene® Stays Fresh Technology

An odor control fabric treatment applied to the backpanel, hipbelt, and shoulder harness mesh inhibits the growth of odor-causing bacteria to keep your pack fresher, longer. Polygiene® Stays Fresh Technology is bluesign® approved, and has Oeko-tex Eco Passports approval.

## AUTO-ROTATING SHOULDER HARNESS

Shoulder harness auto-adjusts to match your shoulder slope angles. While hiking, the rotation allows the pack to move with your body's natural walking movements, which in turn keeps your center of gravity more balanced and ultimately conserves energy on the trail.

## AIRCUSHION BACKPANEL

The foamless backpanel is built from a proprietary 3D mesh with a honeycomb structure consisting of over 90% open-air. This next-generation padding reduces surface contact to provide true on-the-back breathability, eliminates pressure points, has moisture-wicking cooling benefits, and is treated with Polygiene® Stays Fresh anti-odor treatment.

## FREEFLOAT DYNAMIC HIPBELT

The hipbelt is attached to the outer frame via two flex panels that allow the entire hipbelt assembly and lower Comfort Cradle to move independently of the outer frame. This flexibility coupled with the rotating shoulder harnesses allows the pack to adapt and flex with your body's natural movements to save crucial energy and deliver unrivaled comfort. The hipbelt is built with a special cocktail of three different foam densities, most importantly Gregory's LifeSpan EVA, as well a rigid HDPE support layer sandwiched in the center, making this one of the most comfortable hipbelts ever built.

### 3D Shoulder Harness & Hipbelts

Both the shoulder harness and hipbelt are designed to have a pre-curved 3D shape, eliminating bunching and hot spots against your body. The 3D shape also provides consistent padding and support where the load of the pack meets your unique body shape.

### ComfortGrip Lumbar

The soft molded gription pad positioned on the small of the back prevents pack slip while carrying heavy loads. Only found on our Baltoro and Deva collection, this invaluable piece of technology keeps the pack positioned high on the hips to maximize load transfer and avoid the classic over-tightening of the hipbelt.

# PACK FIT REIMAGINED

## »» TORSO LENGTH + BODY SHAPE

Unlike a typical two-torso size offering seen in other adjustable backpacks, the Baltoro and Deva are available in three adjustable torso sizes to deliver unrivaled trail comfort. This unique three-torso size offering means the back length adjustability overlaps across all three sizes, making it possible to select the size that most comfortably fits your back length and curvature, but also gives you the option to size up or down to accommodate a smaller or larger body shapes, without the need for swappable components. **Game changer!**

Torso length can adjust  
7,6 CM ON ALL SIZES

Shoulder harnesses:  
3,8 CM OF LENGTH  
BETWEEN EACH SIZE

Hipbelts adjust  
8,9 CM ON EACH SIDE  
allowing for a  
17,8 CM TOTAL HIPBELT  
ADJUSTMENT

### MEN'S BALTORO

available in three adjustable sizes  
Small, Medium and Large

#### HIPBELT FIT RANGE

SM - 66-122 cm MD - 71-127 cm LG - 76-132 cm

### WOMEN'S DEVA

available in three adjustable sizes  
Extra Small, Small and Medium

#### HIPBELT FIT RANGE

XS - 66-122 cm SM - 66-122 cm MD - 71-127 cm

Size up for longer hipbelts and shoulder harness

Torso length overlap allows user to fit in multiple sizes

Size down for shorter hipbelts and shoulder harness

### »» THE DIFFERENCE BETWEEN MEN'S AND WOMEN'S FIT

We have always been proud of our commitment to the unique differences between Men's and Women's pack fit. Women's packs utilize a more subtle curve in the shoulder harness for a better fit around the bust area, and the hip belt is designed to have a steeper angle to match a Women's geometry. Men's packs use a flatter hip belt angle and a more curved shoulder harness to properly fit the male skeletal structure.

## FEATURES

- › Sunglass QuickStow system on shoulder harness for quick, secure and scratch-free access to your shades
- › Custom fitted raincover included
- › Internal hydration sleeve with SpeedClip hydration hanger compatible with Gregory's 3D Hydro Reservoirs (reservoir not included)
- › SideWinder bottle holster for one-handed on-the-go water bottle access - tucks away when not in use
- › Accessory attachment system located at easy-to-access hip location for bear spray holster's or accessory pouches
- › Adjustable attachment loops and upper shock locks for trekking poles or ice axe
- › Custom ComfortGrip molded zipper pulls and molded webbing keepers for strap management
- › Nano Connect - Included interior toggles to connect Nano 14 Daypack
- › Oversized zippered hipbelt pockets with enough space to fit cell phones and trail essentials

## ACCESS

- › Dual front zippered pockets with floating divider wall
- › Front U-Zip access to main body of pack
- › Floating top pocket with a large zippered compartment, small quick-access pocket and an underside zippered pocket, reflective attachment points, and key clip
- › Zippered bottom sleeping bag compartment with removable divider
- › Side stretch-mesh pocket with pass through for over-or-under compression
- › Front oversized stretch-mesh pocket with secure buckle closure
- › Quick-pull drawcord closure and top webbing compression

## SUSTAINABILITY

Matching performance with sustainability, the Baltoro and Deva maintain the lifetime performance and dependability they're known for while moving in a new, more sustainable direction. Using our proprietary LifeCycle Analysis (LCA) tool, we've used the data to make significant reductions in plastic and the carbon footprint, all while improving fit, heavy-load comfort, and maintaining best-in-class weights.

- › **50% reduction in plastic** - By reengineering pack's support architecture we've reduced the amount of plastic used by 50% over the previous generation.
- › **Sustainable, performance materials** - High-tenacity recycled fibers are used throughout to maximize the performance and lifespan of the pack and minimize the packs carbon footprint.
- › **PFC-Free DWR** - All pack fabrics are treated with a PFC-Free durable water repellent coating.
- › **Polygiene® Stays Fresh treatment** - Extended product life by inhibiting bacterial growth to minimize washing, and skin irritation - all items that lead to premature retirement of packs.

## SUSPENSION

# VERSA FIT

VersaFit suspension is all about the connection between you and the gear you carry. The lightweight alloy frame is directly connected to a hip-wrapping 3D hipbelt providing you with a soft, breathable platform to carry the packs weight. But the real magic is in the adjustable torso length with breathable 3D foam backpanel and FitTune hipbelts, allowing you to make small, quick adjustments for a perfectly tailored fit. These renowned Gregory technologies in combination with the direct-connect hipbelt that works seamlessly with the pack, create a body-hugging fit that will keep you feeling light and nimble all day long.

#### » VERSAFIT ADJUSTABLE TORSO LENGTH:

Torso length: With 4+ inches of continuous adjustment, the adjustable torso length on the Stout and Amber provide excellent fit and support through a direct connection between the frame and the adjustment panel.

#### » 3D FOAM BACKPANEL:

Dual layer, perforated foams provide the perfect balance of support and comfort.

#### » FIT TUNE ADJUSTABLE HIPBELT:

Quick and simple to adjust while wearing the pack, the FitTune hipbelt allows for 4 inches (10 CM) of adjustment for a custom fit.

#### » ALLOY WISHBONE FRAME:

The lightweight alloy frame is directly connected to both the harness and hipbelts for superior load stability and comfort. The wishbone design allows for torsional flex with the support you need to conquer the rock scramble to the summit.

## ICARUS 40

ONE SIZE 111473

Decades of industry experience have given us a wealth of insight into what first-time backpackers need and want. So with that in mind, we created the Icarus 40: an entry-level backpack designed to make those initial scouting, family, and school group trips as fun as possible by focusing on comfort and ease-of-use. An adjustable backpanel and straightforward features and pockets eliminate the common fit and function frustrations that keep beginners from falling in love with the trail.

SPECS: (ONE SIZE)

VOLUME	WEIGHT
40 L	1.03 kg

MAX CARRY 11.3 kg • MAIN ACCESS Top Loader, Sleeping Bag

## FEATURES

- » Dedicated lower compartment for quick access to sleeping bag or extra layers
- » Durable front stretch mesh stuff pocket for quick access to a rain jacket or sandals
- » Top pocket with dual pockets to provide a dedicated area for a headlamp or snacks
- › Reflective webbing loops to easily locate your pack at camp and to clip on accessories
- › Bottom side compression with pass through for uninhibited use of the side mesh pocket
- › Dual mesh side pockets for water bottle access
- › Attachment loop and quick-attach shock lock for trekking poles
- › Hydration Sleeve with Port for easy hose routing
- › Custom comfort grip molded zipper pulls
- › Sternum strap buckle with integrated safety whistle

## MATERIALS

**BODY** 210D BIG RIP NYLON / 420D HIGH DENSITY NYLON

**BASE** 420D HIGH DENSITY NYLON

**LINING** 40% POST-CONSUMER RECYCLED 135D POLYESTER WITH PFC-FREE DWR

**HARNESS/HIPBELT/LUMBAR** PERFORATED DUAL DENSITY CLPE & OPEN CELL FOAM

**CHASSIS SUPPORT** HDPE FRAMESHEET

# PARAGON & MAVEN

LIGHTWEIGHT BACKPACKING

The Paragon and Maven feature an innovative hybrid suspension system that cleverly combines a free floating lower back system with a breathable on-the-back upper back padding system. This unique approach captures the best of both worlds - a super comfy lower back Comfort Cradle system with Gregory's Patent Pending FreeFloat hipbelt tech and a close fitting upper backpanel that saves energy by keeping the bulk of the pack weight close against your back. With a fully loaded but lightweight focused feature set, including full length side-loading access, the Paragon and Maven will make your next few days on the trail a dream come true.

## HYBRID SUSPENSION

HYBRID SUSPENSION FEATURING GREGORY'S FREEFLOAT DYNAMIC COMFORT CRADLE LOWER BACK SYSTEM AND BREATHABLE 3D FOAM UPPER BACKPANEL SUPPORT

## FULL LENGTH SIDE ZIPPER

FULL LENGTH SIDE-LOADING ACCESS ZIPPER FOR EASY UNLOADING AND GEAR ORGANIZATION

## CUSTOM FIT

FULLY ADJUSTABLE TORSO LENGTH AND CUSTOMIZABLE HIPBELT FIT

## PARAGON + MAVEN

### FEATURES

- » FreeFloat breathable suspension with dynamic flex panels that move with the natural movements of your body
- » Full length side-loading access zipper for easy unloading and gear organization
- » Adjustable torso length with 3D perforated foam breathable backpanel
- » 3D Comfort Cradle adjustable hipbelt with 3D construction for hotspot free, body-hugging comfort
- » Perforated dual density shoulder harness with sternum strap featuring integrated safety whistle and hydration clip
- » Wishbone alloy frame and fiberglass anti-barreling cross-stay for stable load management and torsional flexibility
- » Custom fitted raincover included
- » Sunglass QuickStow system on shoulder harness for quick, secure and scratch-free access to your shades
- » Internal hydration sleeve with SpeedClip hydration hanger compatible with Gregory's 3D Hydro reservoir (reservoir not included)
- » Floating top pocket with large zippered compartment and an underside zippered pocket, reflective attachment points and key clip
- » Dual side stretch mesh pockets, one with side trail access, with pass through for over or under compression
- » Front oversized stretch mesh pocket with secure buckle closure
- » Quick-pull drawcord closure and top webbing compression
- » Zippered bottom sleeping bag compartment with removable divider
- » Adjustable attachment loop and upper shock lock for trekking poles or an ice axe
- » Custom comfort-grip molded zipper pulls and molded webbing keepers for strap management
- » NANO CONNECT - Included interior toggles to connect Nano 14 daypack

SUSPENSION

**FREEFLOAT**

The key to long lasting comfort is designing a pack to work with the free movement of your body vs. fighting against your natural hiking motion. The Patent Pending FreeFloat's lower back Comfort Cradle system allows the structure of the pack to float independently from the movement generated by your body as you hike, all while maintaining proper load transfer evenly from the front edge of your hips through your lower back.

**COMFORT CRADLE SYSTEM FLOATS INDEPENDENTLY FROM THE MOVEMENT GENERATED BY YOUR BODY AS YOU HIKE**

**(DYNAMIC HIPBELT)** The hybrid suspended mesh lower portion with the FreeFloat flex panels allow for your body to move naturally while maintaining the load support provided by the breathable foam backpanel.

**» 3D FOAM BACKPANEL:**

Designed to minimize contact, while keeping the pack weight very close to your center of gravity, the 3D foam backpanel utilizes a unique cross-cut process to create space between you and the pack allowing for airflow.

**» ADJUSTABLE 3D COMFORT CRADLE BELT:**

An evolution of our PreCurve 3D hipbelts found on the award winning Baltoro and Deva packs, the Paragon and Maven hipbelts use 3D Foam construction for body hugging, hot-spot free comfort. By integrating the hipbelt directly into the suspended lower back lumbar support we are able to create an ultra-soft, ventilated Comfort Cradle that wraps around your lower back and adjusts to your hips for the perfect fit every time.

**» PERIMETER FRAME:**

The lightweight alloy perimeter frame, in combination with the Fiberglass cross stay, keeps the weight close to your back and well connected the FreeFloat suspension.

**» MEN'S & WOMEN'S GEOMETRY:**

True to our commitment to gender-specific design, the Paragon and Maven feature tailored shoulder harnesses for women and men. The angles and shape of the 3D Comfort Cradle also feature a gender-specific design to maximize comfort and provide even pressure around your hips.

• MAIN ACCESS Top Loader • MAX CARRY 15.9 kg

## SUSPENSION

**FREEFLOAT**

Engineered for long mileage days and long-term objectives, the superlight, dynamic FreeFloat suspension maximizes efficiency and comfort. The system is designed around a hollow 7001 series perimeter frame that allows the 3D Comfort Cradle hipbelt assembly to float. The flex panels link the belt to the frame on each side providing an efficient, supportive carry. This dynamic system is ultra-ventilated with Polygiene® Stays Fresh treated mesh to maximize airflow and fight against odor-causing bacteria.

**(DYNAMIC HIPBELT)** FreeFloat Dynamic Hipbelt - Built to float independently of the pack frame, the FreeFloat hipbelt is suspended across the perimeter frame and anchored on each side by flexible panels that allow the belt to flex with the natural movements of your body. The seamless, wrapping design provides a cradling fit from your hips through your lumbar for pressure-point-free support.

**» OPEN-AIR MESH BACKPANEL**

Full-length moisture-wicking mesh wraps uninterrupted from the tips of the hipbelt to the harness ends. Oversized holes in the mesh along with the integrated odor-control treatment maximize airflow and guard against microbial growth that can lead to skin irritation and smelly packs.

**» COMFORT WRAP SHOULDER HARNESS**

Designed with a seamless transition from the open mesh backpanel for a pressure point-free load. The interior edge of the harness wraps to the top of the harness to create an edge-free padding, minimizing hot spots.

**» DUAL ZIPPERED HIPBELT POCKETS**

Engineered to minimize weight while providing on-the-go storage, the padded hipbelts make sure even the lightest loads are riding comfortably.

**» POLYGIENE® STAYS FRESH TECHNOLOGY**

An odor control fabric treatment applied to the backpanel, hipbelt, and shoulder harness mesh, inhibiting the growth of odor-causing bacteria to keep your pack fresher, longer.

**» ULTRALIGHT TUBULAR ALUMINUM FRAME**

The perimeter design combined with the hollow 7001 series aluminum frame results in an ultralight, stiffened chassis that allows the FreeFloat hipbelt to conform to and flex with your body.

**» MULTI-FIT SIZING**

By providing two sizes, the Focal maintains the minimalist ultralight weights thru-hikers seek while accommodating a wide range of body shapes.

# FREEFLOAT 360

MOVES WITH YOU

# KATMAI & KALMIA

VENTILATED BACKPACKING

Dynamic fit and comfort fused with ventilated, odor reducing technology, the FreeFloat 360 flexes, rotates, and reacts to your body providing a revolution in backpacking technology. The Katmai and Kalmia packs match performance with capability. Durable, recycled nylon material combined with easy to navigate pocketing and access to belongings provide a premium backpacking experience. Engineered using a perimeter alloy frame for stable, responsive support, the FreeFloat 360 suspension on the Katmai and Kalmia deliver unprecedented comfort for your next backpacking adventure.

## FREEFLOAT 360

VENTILATED, SUSPENDED MESH BACKPANEL FEATURING FREEFLOAT DYNAMIC COMFORT CRADLE LOWER BACK SYSTEM AND ROTATING HARNESSSES FOR THE ULTIMATE IN DYNAMIC FIT AND COMFORT.

## PERFORMANCE PACKAGE

BUILT WITH RECYCLED HIGH-DENSITY NYLONS AND A SUSPENSION FEATURING POLYGIENE® STAYS FRESH TECHNOLOGY THAT INHIBITS THE GROWTH OF ODOR-CAUSING BACTERIA, KEEPING YOUR PACK FRESHER, LONGER.

## CUSTOMIZABLE COMFORT

AN ADJUSTABLE TORSO LENGTH AND A CUSTOMIZABLE 3D COMFORT CRADLE HIPBELT WORK TOGETHER TO GIVE YOU UNMATCHED FIT FOR HOTSPOT FREE, BODY-HUGGING COMFORT.

#### **AUTO-ROTATING SHOULDER HARNESS**

Adapted from the award-winning Baltoro and Deva, the Katmai and Kalmia feature an adjustable, auto-rotating harness designed to pivot and move with you. The proprietary auto-rotating hardware also provides a custom fit-angle to each user, maximizing comfort and support.

---

#### **BUILT WITH RECYCLED MATERIALS >>>**

All fabrics on this bag are made from recycled content and PFC-free DWR resulting in a **28% reduction in the carbon footprint** when compared to a conventional nylon pack.

Offset the remaining carbon footprint of this product by choosing to walk, bike or hitch a ride for **89 miles** instead of driving. This effort will offset the remaining carbon footprint of this pack.

\*Katmai 55

**FREEFLOAT DYNAMIC HIPBELT**

Designed to flex with the natural movements of your body, the FreeFloat panels connect the 3D Comfort Cradle hipbelt to the pack's frame, providing dynamic, pressure point free support. This system keeps the weight of the pack stabilized, but not rigid, so the pack works with you to save energy as you move down the trail.

- › Floating top pocket with large zippered compartment, small quick-access pocket and an underside zippered pocket, reflective attachment points and key clip
- › SideWinder bottle holster for one-handed on-the-go water bottle access - tucks away when not in use
- › Side stretch mesh pocket with pass through for over-or-under compression routing
- › Front oversized stretch mesh pocket with secure buckle closure
- › Quick-pull drawcord closure and top webbing compression
- › Zippered bottom sleeping bag compartment with removable divider
- › Adjustable attachment loops and upper shock locks for trekking poles or ice axe
- › Custom ComfortGrip molded zipper pulls and molded webbing keepers for strap management
- › NANO CONNECT - Included interior toggles to connect Nano 14 Daypack

SUSPENSION

## FREEFLOAT 360

Ventilated, suspended mesh backpanel featuring Gregory's FreeFloat dynamic Comfort Cradle lower back system and rotating harnesses for the ultimate in dynamic fit and comfort.

The rotating shoulder harness pioneered in our award winning Baltoro and Deva packs is joined with the lower FreeFloat system to provide an auto-fitting, dynamic carry system.

The hybrid suspended mesh lower portion with FreeFloat flex panels allow for your body to move naturally while maintaining the load support provided by the breathable foam backpanel.

» ROTATING SHOULDER STRAPS:

Inspired by our flagship Baltoro and Deva packs, the rotating shoulder straps auto-fit and pivot to match your body's shape and movements. Get unmatched dynamic fit and comfort with dual-density EVA foam for superior cushioning and an adjustable torso.

» ADJUSTABLE FREEFLOAT DYNAMIC HIPBELT:

A seamless, precurved hipbelt and lumbar system provides both support and comfort in one assembly for pressure point free comfort. By integrating the hipbelt directly into the suspended lower back support we are able to create an ultra-soft, ventilated Comfort Cradle that wraps around your lower back and adjusts to your hips for the perfect fit every time.

» POLYGIENE® VENTILATED BACKPANEL:

Moisture wicking ventilated backpanel mesh features Polygiene® Stays Fresh Technology to inhibit the growth of odor-causing bacteria, keeping your pack fresher, longer.

» PERIMETER FRAME:

The lightweight alloy perimeter frame, in combination with the fiberglass cross stay, provide a low profile air gap between the wearer and pack for the ultimate in ventilated comfort.

» MEN'S AND WOMEN'S GEOMETRY:

Shoulder harnesses and hipbelts are designed with gender-specific geometry. The angles and shape of the 3D Comfort Cradle maximize comfort and provide even pressure around your hips where it matters most.

SUSPENSION

What's more important, breathability or fit?

When it comes to suspension design, airflow tends to be at odds with adjustability. It's a major letdown if you're seeking great fit along with great ventilation, and it's a choice you shouldn't have to make.

The new FreeFloat system incorporates adjustable torso length into its tensioned, open-air backpanel. It's a revolutionary approach to ventilated suspension, and we could have stopped there—but we didn't.

Patent pending FreeFloat flex panels allow the the hipbelt to pivot and flex with the natural movements of your body. This provides a floating sensation on the trail, and allows the hipbelt to wrap smoothly and comfortably around you lower back and hips.

In other words, we designed an elegant, yet simplified load-handling solution that's flexible, customizable, and fully ventilated, yet light and low profile. You'll love the way it fits, feels, and performs on the trail.

COMFORT CRADLE SYSTEM FLOATS INDEPENDENTLY FROM THE MOVEMENT GENERATED BY YOUR BODY AS YOU HIKE

» OPENAIR BACKPANEL:

In order to maximize ventilation, we've designed a torso adjustment that that doesn't block that cool breeze you crave on your fourth day in the desert. By directly connecting the adjustment panel to the frame rather than the backpanel itself, we've created a full-length, ventilated backpanel that conforms to your torso height for the perfect fit.

» 3D COMFORT CRADLE:

An evolution of our PreCurve 3D hipbelts found on the Award winning Baltoro and Deva packs, the Zulu and Jade hipbelts use 3D Foam construction for body hugging, hot-spot free comfort. By integrating the hipbelt directly into the suspended lower back lumbar support we are able to create an ultra-soft, ventilated Comfort Cradle that wraps around your lower back and hips for the perfect fit every time. For added support, the larger models include an additional layer of Lifespan foam to ensure proper load support hangs around for years of weekend outings.

» PERIMETER FRAME:

The lightweight perimeter frame, in combination with the Fiberglass cross stay, keeps the weight close to your back and well connected the FreeFloat suspension.

» MEN'S & WOMEN'S GEOMETRY:

True to our commitment to gender-specific design, the Zulu and Jade feature tailored shoulder harnesses for women and men. The angles and shape of the of the 3D Comfort Cradle also feature a gender-specific design to maximize comfort and provide even pressure around your hips.

## JADE 28

XS/SM 111570 SM/MD 111569

Despite what you see out on the trail, women's-specific daypacks can have proper load support, custom-level adjustability, and open-air ventilation providing year-round comfort and incredible fit. How do we know? Because the Jade 28 has all of the above and more.

SPECS: (SIZE SM/MD)

VOLUME	WEIGHT	RAINCOVER WEIGHT
28 L	1.17 kg	64 g

MAX CARRY 16 kg ▪ MAIN ACCESS Zippered

## JADE 33

XS/SM 111572 SM/MD 111571

Pack what you need for a day in the mountains, then add some more gear just in case. The Jade 33 offers extra space not found in many women's active daypacks, giving you more room for layers and food—supplies that will come in handy if unpredictable terrain and changing conditions are par for your weekend hiking course. Ventilated, adjustable, body-hugging Free Float suspension fits like it was custom made for you, and helps you move like you're carrying a much smaller pack.

SPECS: (SIZE SM/MD)

VOLUME	WEIGHT	RAINCOVER WEIGHT
33 L	1.26 kg	68 g

MAX CARRY 16 kg ▪ MAIN ACCESS Top Loader, U-Zip

## JADE 38

XS/SM 111574 SM/MD 111573

With nearly 40 liters of capacity, the Jade 38 offers far more room than a daypack, but an incredibly light and sleek profile specifically designed for a women's backpack. Ready for an overnight or a warm-weather long weekend, this is the pack to take when elevation changes and terrain challenges more than make up for the mileage.

SPECS: (SIZE SM/MD)

VOLUME	WEIGHT	RAINCOVER WEIGHT
38 L	1.30 kg	68 g

MAX CARRY 16 kg • MAIN ACCESS Top Loader, U-Zip

## JADE 53

XS/SM 111576 SM/MD 111575

Ventilated suspension and a body-hugging design make the Jade 53 feel like a daypack, even when hauling everything you need for a four-day weekend in the backcountry. Free Float's adjustable Open Air backpanel provides a custom fit with unbeatable breathability, so you stay comfortable over longer distances in all conditions.

SPECS: (SIZE SM/MD)

VOLUME	WEIGHT	RAINCOVER WEIGHT
53 L	1.58 kg	91 g

• MAX CARRY 18 kg  
• MAIN ACCESS Top Loader, U-Zip, Sleeping bag

“

Made with FreeFloat suspension, the Zulu and Jade's hipbelts can pivot and flex with your body. This creates a 'floating sensation' on the trail.

”

- GEAR JUNKIE

# CITRO & JUNO

VENTILATED HIKING

Sometimes the best plan is to just put the pack on your back and go. The Citro and Juno make decisions simple with the ventilated VaporSpan backpanel to keep you cool and dry and the ActiveFlex dynamic shoulder harness stay comfortable all day long. Stash your sunglasses on your harness when you hit the shade of the forest, or pack out that wet swimsuit in the front mesh pocket, these daypacks are ready for a full day of letting mother nature take the wheel.

**CHASSIS SUPPORT** ALLOY STEEL FRAME

## SUSPENSION

# VAPORSPAN

Ventilated comfort for those ready to turn every outing into a new experience. The VaporSpan ventilated backpanel and 3D hipbelt cradle your hips providing a seamless, barely there fit, that is only enhanced by the flex harness. Perforated EVA foam on both the shoulder strap and hipbelt provide breathable support for dawn-to-dusk days when you make sure that the sunset picnic has enough wine and cheese for the whole crew.

### » VAPORSPAN BACKPANEL:

The moisture wicking mesh on the backpanel actively moves perspiration away from your body into the suspended zone of the backpanel resulting in a quick drying, airy comfort.

### » 3D WRAPPING HIPBELT:

A one-piece design provides a seamless, cradling fit around your hips giving you support and all-day comfort.

### » FLEX HARNESS:

The flexible perimeter of the harness, in sync with the perforated EVA foam and breathable mesh, provide a supportive, dynamic fit that moves with the natural motion of your body.

				BIO SYNC				

## SUSPENSION

We designed the Miwok and Maya backpacks for all-terrain agility, and they've never been lacking in that department. But in order to reap the full reward of their design, you also need a perfect fit—and that's hard to achieve in a suspension as lightweight, breathable, and flexible as BioSync. Variable positioning in the BioSync shoulder harness—provided by a secure hook-and-loop panel interface that allows for infinite fine-tuning along a wide range of adjustment—helps achieve that perfect fit.

When combined with new BioSync body wrapping design, flexible “tendon” harness linkages, and dynamic harness and hipbelts that flex and adapt to your every movement, the Miwok and Maya experience has been taken to the next level.

### » ADJUSTABLE TORSO LENGTH:

9 cm of torso length adjustment with integrated BioSync harness featuring unique Sunglass stow system.

### » BIOSYNC FLEXIBLE TENDONS:

Stretch mesh integrated into the harness attachment works with your body's natural movement to keep the pack balanced when you have tunnel vision on single-track.

### » BIOSYNC WRAP HIPBELT:

Stretch construction and a full surround belt create a stable, flexible platform for quick hikes during magic hour. Dual zippered hipbelt pockets complete the package.

### » AIRWAVE BACKPANEL AND MOISTURE WICKING HARNESSSES:

3D open-air backpanel reduces back contact and encourages airflow. Moisture wicking aero-mesh on backpanel and harnesses transfer and evaporate sweat as your body temperature rises.

## MIWOK 12

ONE SIZE 111479

BioSync flexibility and durable lightweight fabrics make the sleek and minimal Miwok 12 the one to reach for whether you're headed out for a casual summer hike or a long-distance trail run. Ideally suited for any high-output activity on the trail, the Miwok 12 is compact enough to stuff in your luggage as an active daypack companion during your travels.

SPECS: (ONE SIZE)

VOLUME	WEIGHT
12 L	703 g

MAX CARRY 6.8 kg • MAIN ACCESS Panel loader

## MIWOK 18

ONE SIZE 111480

Seeking a lightweight backpack for speed hiking or summer peak bagging? The Miwok 18 brings flexible BioSync suspension and just enough volume for packable insulation and lunch. A stretch front pocket adds room to this active backpack for an ultralight rain shell for fast layer changes on the trail.

SPECS: (ONE SIZE)

VOLUME	WEIGHT
18 L	803 g

MAX CARRY 9.1 kg • MAIN ACCESS Panel loader

## MIWOK 24

ONE SIZE 111481

Designed for active trail pursuits but capable of much more, the Miwok 24 combines flexible BioSync ventilated suspension with the volume and features you want in a daypack, commuting pack, or all-around lightweight backpack. Top to bottom BioSync fit provide unhindered motion and low profile stability, in keeping with the Miwok philosophy of agility and balance.

SPECS: (ONE SIZE)

VOLUME	WEIGHT
24 L	839 g

MAX CARRY 9.1 kg • MAIN ACCESS Panel loader

## MIWOK 32

ONE SIZE 126859

For when you need some extra space for the day, but you still plan on taking on some challenging terrain, the Miwok 32 and its BioSync flexible suspension keep things supported while you're moving quick. Stash valuables in the top, quick-access zippered padded pocket, and dial in the fit for a full day with the adjustable torso.

SPECS: (ONE SIZE)

VOLUME	WEIGHT
32 L	1.02 kg

MAX CARRY 13.6 kg • MAIN ACCESS Panel loader

## MIWOK 42

ONE SIZE 126860

An alloy frame supported pack with the dynamic BioSync flexible suspension system giving you the ability to bring more and move faster. The Miwok 42 and the large U-Zip access make packing up your picnic fast, and the zippered top pocket keeps the essentials close at hand.

SPECS: (ONE SIZE)

VOLUME	WEIGHT
42 L	1.27 kg

MAX CARRY 15.9 kg • MAIN ACCESS Top loader

“On days when you were speeding down the trail, this pack and its body-hugging fit were an easy pick.”

## MAYA 10

ONE SIZE 111476

As small as it is, the Maya 10 sets a standard for active women's backpacks that few can meet. Offering just-right capacity for lightweight loads, this 10-liter hydration-compatible pack excels on any trail thanks to its flexible BioSync suspension.

SPECS: (ONE SIZE)

VOLUME	WEIGHT
10 L	658 g

MAX CARRY 6.8 kg • MAIN ACCESS Panel Loader

## MAYA 16

ONE SIZE 111477

Flying across a 9,000-foot Colorado ridgeline in July, the last thing you want to be thinking about is your backpack. That's why we made the Maya 16: to carry a rain shell, lunch, first aid, water, and all the odd accessories you bring on warp-speed hikes, and to hug your body like a bear cub as you bounce from boulder to boulder.

SPECS: (ONE SIZE)

VOLUME	WEIGHT
16 L	748 g

MAX CARRY 9.1 kg • MAIN ACCESS Panel Loader

## MAYA 22

ONE SIZE 111478

Dodging momma moose on overgrown single-track in DownEast Maine or dodging scooters on a narrow cobblestone alley in Prague, the Maya 22 handles the gear while you handle traffic of any kind. This low-profile 22-liter women's backpack excels at active use, with flexible BioSync suspension keeping you agile and free.

SPECS: (ONE SIZE)

VOLUME	WEIGHT
22 L	798 g

MAX CARRY 11.3 kg • MAIN ACCESS Panel Loader

## MAYA 30

ONE SIZE 126857

Pack to tackle sun-up to sun-down days with the Maya 30 knowing you're planning to cover some serious miles. The BioSync flexible and adjustable harness and hipbelt mean you can tighten down the load and still maintain the dynamic range of motion you need to focus on getting to the next ridgeline.

SPECS: (ONE SIZE)

VOLUME	WEIGHT
30 L	984 g

MAX CARRY 13.6 kg • MAIN ACCESS Panel Loader

## MAYA 40

ONE SIZE 126858

The Maya 40 gives you the BioSync dynamic suspension with the added support of an internal wishbone alloy frame. The large U-Zip front and quick-pull top opening allow multiple access options so you can pack the kitchen sink knowing you don't have to dig to find your jacket when the rain starts.

SPECS: (ONE SIZE)

VOLUME	WEIGHT
40 L	1.20 kg

MAX CARRY 15.9 kg • MAIN ACCESS Top Loader

“

If you're looking for a day-hiking bag that can pull double-duty as an everyday bag, I recommend taking a look at the Maya 16.

”

# 3D HYDRO TREK

HYDRATION

**The first-ever reservoir designed for backpacking, hiking and backcountry basecamps, the 3D Hydro Trek is quick-drying and ready for adventure.**

It's time for a new reservoir in the backcountry. Gregory's 3D Hydro Trek is a versatile reservoir designed for backpacking, backcountry kitchens and everyday hiking. The unique, round shape is specifically designed to fit at the top of your backpack, both to keep the load balanced and for easy trail access in larger, top-loading packs. Upgrade your backcountry kitchen setup with the reservoir's push-button pour-spout, integrated quick-disconnect compatible with your water filter and a built-in basecamp hanger. You get all the benefits of our quick-drying 3D molded design, in a package designed for extended trips in the backcountry and everyday adventures.

» 3 Modes of Use

“ IT’S TIME FOR A NEW RESERVOIR IN THE BACKCOUNTRY ”

1. BACKPACKING:

The unique round shape is designed to fit in any multi-day top loading pack, secured by the drawstring closure and top compression - keeping your pack load balanced and allowing quick access for mid-day filtration

- › **Specialized Reservoir Shape** - A design more round and shallow than conventional reservoirs, allowing it to fit conveniently at the top of your pack, secured under the drawstring closure or the top compression
- › **Backcountry Filter Integration** - Game-changing on-trail filtration due to the super accessible location at the top of your pack. Uses standardized fittings to integrate with any filtration system with a quick disconnect
- › **EasyGrip Fill port** - Rubberized fill port for easy opening and filling - compatible with 38mm pump filters
- › **Top-Loading Design** - The unique round shape is designed to fit at the top of your pack as well as in your traditional hydration sleeve. The wide body shape keeps the weight distribution high-and-tight on your body. When secured in the top position by the drawstring closure and top compression, your pack load remains balanced and this location provides easy trail access.
- › **Heavy Duty Film Construction** - Increased film thickness for added durability over standard hydration reservoirs

2. BASECAMP MODE:

Push button water delivery system for when you settle down at camp with included universal hanger

- › **Basecamp Tap** - Push-button pour spout with fast water flow and less spillage for filling stoves, water bottles or hand washing while in camp
- › **Molded Spine Handle** - A comfortable, soft-molded handle makes filling easy and the molded baseplate (with integrated hose quick disconnect) support hassle-free insertion and removal from the pack
- › **Fill-Port Cover** - Molded dust cover to protect the basecamp pour spout from dirt and grim on the trail and worry-free storage while on the trail
- › **Basecamp Hanger** - Molded hanger loop with an included reflective webbing strap to set up a convenient camp water station and hang dry an empty reservoir

♻️ PACKAGING MADE WITH RECYCLED MATERIALS

### 3. DAY HIKING:

Compatible with 3D Hydro enabled packs, featuring the SpeedClip hydration mounting system for cross-over use

- › **3D QuickDry** - Soft-molded 3D reservoir design prevents contact between the top and bottom layers, speeding up drying time and discouraging bacteria growth
- › **Quick Disconnect** - Integrated 90° quick disconnect fitting for smooth hose routing and quick removal of reservoir
- › **SpeedClip Mounting System** - One-handed SpeedClip lock-and-go linkage system which can be used with most full-size daypacks
- › **DryLock Magnetic Bite Valve** - Push-button on/off bite valve allows for leak-free storage while traveling to and from the trail (magnet accessory included)

PERFORMS LIKE A  
**RESERVOIR**  
DRIES LIKE A  
**WATER BOTTLE**

FEATURES

**3D QUICKDRY:**

Soft-molded 3D design prevents contact between top and bottom layers when hanging open, dramatically speeding drying time and discouraging bacteria growth

**QUICKDRY HANGER:**

A convenient option for storage or hang drying on or off the trail, integrated into the reservoir itself

**SPEEDCLIP MOUNTING SYSTEM:**

3D Hydro enabled Gregory packs feature a one-handed Lock-And-Go linkage between the reservoir hanger and the SpeedClip system mounted inside the packs hydration sleeve

**ANATOMICAL FIT:**

3D form and full-length baffle properly distribute the weight of the reservoir by positioning the water flat against your back for optimal stability and comfort, without adding weight and cylindrical bulk

» 2L & 3L RESERVOIRS

Gregory's 3D Hydro Reservoir is engineered with a patented, flex-molded 3D design that performs like a reservoir but dries as quickly, and cleanly as a water bottle. The Spine co-molded handle and rigid baseplate provide stable, hassle-free refills and the integrated hose port and routing for ease of use never seen before in a hydration reservoir. When combined with our proprietary SpeedClip mounting system, Drylock magnetic bite valve, integrated QuickDry hanger, and inline hose quick-disconnect, the 3D Hydro Reservoir provides you with an unrivaled hydration system.

 PACKAGING MADE WITH RECYCLED MATERIALS

#### SPINE MOLDED HANDLE:

A comfortable, soft-molded handle makes filling easy and the co-molded baseplate provides full-length support for hassle-free insertion and removal from the pack

#### QUICK DISCONNECT:

Inline hose quick-disconnect for easy refills without having to un-thread the hose from the shoulder harness

#### DRYLOCK MAGNETIC BITE VALVE:

Push button on/off bite valve allows for confident, leak-free storage while traveling to and from the trail (magnet accessory included)

#### EASYGRIP FILL PORT:

Rubberized fill port opening with integrated hose locator for inline quick-disconnect and screwcap tether

# RAINCOVER

Waterproof protection with a more sustainable approach, our Raincover collection utilizes recycled polyester ripstop material to provide a durable barrier for your pack from the elements. Reflective logos, secure attachments, and a tidy package allow you to make time for the trail on rainy days.

## WHAT'S

### NEW

- › Recycled ripstop polyester material
- › Now available in four sizes
- › New FSC certified packaging
- › Attached storage pouch with Gregory Mountain Products' lifestyle logo
- › Oversized reflective logo
- › More durable elastic attachment with adjustable hook
- › New printed version

## FEATURES

- › Waterproof, seam-taped construction for maximum protection from the elements
- › Elasticized drawcord attachment with hipbelt loops and adjustable hook closer to be clasped above the pack's harnesses
- › Oversized front reflective logo to easily spot your pack in the dark
- › Attached storage pouch with secure envelope closure
- › Bottom drain hole to prevent excess moisture pooling

# RESIN

EVERYDAY ADVENTURE

The Resin daypack makes your routine easier while also making your impact lighter. A design focused on sustainable materials, weather protection and smart organization, the Resin is grounded in the use of recycled materials and PVC-free coated fabrics, reducing the impact each bag has on the world.

## IMPACT INFORMED

DESIGNED USING GREGORY'S PRODUCT LIFECYCLE TOOL TO MAKE SMART DESIGN DECISIONS THAT RESULT IN A REDUCED IMPACT ON THE WORLD.

## RECYCLED MATERIALS

LINER, BACKPANEL AIRMESH, AND EXTERIOR FABRICS - THE RESIN PACKS ARE CONSTRUCTED ENTIRELY FROM RECYCLED FABRICS.

## ROUTINE RELIABILITY

WEATHER-RESISTANT, PADDED FRONT PANEL AND A DEDICATED PADDED LAPTOP SLEEVE MAKE DAILY USE FRUSTRATION-FREE AND THE STABILIZED FRONT HANDLE GIVES A UNIQUE, CENTER-OF-GRAVITY CARRY, FOR UNINHIBITED ACCESS.

BUILT WITH

MATERIALS

# RESIN

The first step to creating a better, more sustainable product is to gain knowledge. Through a partnership with an industry leading lifecycle assessment firm, we evaluated our current product and developed custom software to help guide our designs. This software helps us pinpoint where we can make the most difference and reduce the overall impact. This lifecycle assessment tool calculates all materials and energy used to create, sew and ship the finished product. The design of the Resin packs was driven by this tool resulting in lower impact material choices and more refined construction techniques. The result is a streamlined, functional pack with a 59%\* reduction in carbon footprint compared to conventional nylon pack. \*RESIN 25L

### Carbon Footprint

A measure of greenhouse gas emissions, such as CO<sup>2</sup> & methane  
**TOTAL IMPACT: 8.18 kg CO<sup>2</sup>**

REDUCED  
**58%**

### Acidification

A measure of emissions that causes negative acidifying effects to soil, fish and forests  
**TOTAL IMPACT: .04 kg SO<sup>2</sup>**

REDUCED  
**36%**

### Water Pollution

Otherwise known as Eutrophication. Covers all potential impacts of macronutrients such as nitrogen & phosphorus, which can shift species composition and elevate biomass production

**TOTAL IMPACT: 1.91 kg N**

REDUCED  
**41%**

\* Reduction percentages are in comparison to the same product made from conventional (virgin) nylon  
\* Approximations are derived from the unweighted average of the three different styles of the resin daypack collection

**NUMBERS THAT MAKE SENSE**

\*Resin 25L

**Smog Formation**

Otherwise known as ozone creation. A measure of emissions of precursors that contribute to ground level smog formation.  
**TOTAL IMPACT: 52 kg O<sup>3</sup>**

**Primary Energy Demand**

A measure of the total amount of primary energy extracted from the earth  
**TOTAL IMPACT: 162.2 net cal**

**Blue Water Consumption**

A measure of the net intake and release of fresh water across the life of the product system  
**TOTAL IMPACT: 12 gal**

\* Impact numbers shown represent impact potentials of the product's full lifecycle (raw goods, manufacturing, packaging, distribution and disposal)  
\* Data Source: Independent third-party LCIA GaBi software results commissioned by Gregory and developed by Thinkstep (thinkstep.com)

## FEATURES

## SUSPENSION

### TRAIL-RATED COMFORT FOR THE MODERN ADVENTURER.

Driven by the innovation found on our award-winning trail packs, the Juxt features a 3D comfort cradle lumbar and hipbelt support in a modern, stylish package. Breathable airmesh and configurable hipbelts provide trail-rated comfort in a clean travel-ready aesthetic.

#### » PERIMETER FRAME

The internal, lightweight alloy frame keeps weight supported and close to your back, in addition to providing a solid platform to suspend the included electronics caddy for added protection.

#### » 3D COMFORT CRADLE LUMBAR AND HIPBELT

Hot-spot free, wrapping hipbelt support with zippered pockets on the 34L and a minimalist, tuck-away hipbelt on the 28L.

#### » HYBRID BACKPANEL

A hybrid backpanel combining a suspended lumbar with a breathable backpanel for superior, long-lasting comfort.

#### » BREATHABLE SHOULDER HARNESS

3D mesh shoulder harnesses with removable sternum strap buckle and Hypalon attachment loop for accessories.

# THE ULTIMATE FOR THE ORGANIZED ADVENTURER

## EXPLORE

A large main compartment for full-day missions with a hybrid suspension and 3D comfort lumbar for all-day comfort.

## WORK

A separate compartment with all the organization you need and more to stay efficient so you can spend more time doing the fun stuff.

## TRAVEL

Quick-release electronics caddy lets you keep the essentials close while your pack spends the flight in the overhead compartment.

## JUXT 28

### MATERIAL 132710

Planes, boats, donkey's, the Juxt 28 is ready to be your companion no matter the mode of transportation. A weather-resistant, PVC-free coated fabric front panel keeps gear protected, and the removable electronics caddy combine to complement the organized adventurer. With a perimeter frame, and 3D comfort cradle lumbar, the Juxt 28 is born of the trail, but styled to be at home in the Grand Central Terminal.

35L

45L

Through time-tested technology and a focus on alpine needs, we deliver three pack series, each committed to on-mountain reliability, performance, and customization. Offering a range of volumes and feature sets within each series, Alpinisto and Targhee provide mountain athletes an option for any alpine pursuit.

# ALPINISTO LT

Not all alpine packs are created equal. That's why the Alpinisto LT is designed to adapt to your day in the Alpine. Lightweight, durable materials and integrated gear carry are the heart of this pack that can transform from a minimalist approach pack to a peak-bagging, vertical-climbing beast. Attach your tools, crampons and rope, and head out for day of firsts in the lightweight Alpinisto LT.

## FEATURES

- » FusionLite suspension with removable HDPE framesheet and thermoformed, snow shedding backpanel
- » Removable and linkable hipbelt pads with gear loops and completely removable hipbelt webbing
- » Low-profile tapered harness with removable sternum strap featuring integrated safety whistle
- » Floating top pocket with zippered security pocket on the underside and quick release hardware for convenient strip ability
- » Front aluminum top pocket buckle closure that is removable
- » Bottom reinforced side ski loops configured for A-Frame carry
- » Front ice tool attachment with durable aluminum toggle system and protected pick sleeve
- » Front reflective attachment loops for helmet carry and gear overflow
- » Front bungee attachment for securing gear
- » Top rope strap with offset design for a more stable carry
- » Large quick-pull drawstring opening
- » Interior zippered pocket for added, secure storage when top pocket is stripped
- » Interior hydration sleeve with universal secure buckle hanger system and hydration port
- » Top and bottom side compression with side release buckles
- » Double layered bottom panel for added durability

## SUSPENSION

## FUSION LITE

The Fusion Lite configurable suspension on the Alpinisto LT is designed to adapt to your alpine system. A removable frame sheet, and hipbelt pads convert this lightweight pack into a minimalist on-route pack. Re-fit the hip-pads and you have a pack worthy of the sketchy approach required to check off your next goal.

» **SNOW SHEDDING BACKPANEL:**

The unique faceted design of the thermoformed backpanel prevents snow build up and protects your back from gear.

» **REMOVABLE HIPBELT PADS:**

The hip-pads can be anchored to the pack for more stable load carry, or can be slid along the hipbelt webbing to accommodate a harness and gear.

» **LOW-PROFILE HARNESS:**

The tapered, low profile harness provide the right balance between support and performance.

## ALPINISTO LT 28

SM/MD 126853 MD/LG 130228

The Alpinisto 28 LT offers a fully-featured alpine pack in a lightweight, configurable package. Integrated gear attachment solutions and removable features allow you to get your gear just the way you like it, so you can focus on the fun part.

SPECS: (SM/MD)

VOLUME	WEIGHT	STRIPPED WEIGHT
28 L	993 g	603 g

MAX CARRY 13.6 kg • MAIN ACCESS Top loader

Zest Orange -6096

### MATERIALS

**BODY** 100D HIGH DENSITY NYLON & 210D HIGH DENSITY NYLON

**BASE** 210D HIGH DENSITY NYLON

**LINING** 135D HIGH DENSITY 40% RECYCLED POLYESTER WITH PFC-FREE DWR

**HARNES/ HIPBELT/ LUMBAR** LIFESPAN EVA FOAM

**CHASSIS SUPPORT** HDPE COMPOSITE / CLOSED CELL FOAM

## ALPINISTO LT 38

SM/MD 126854 MD/LG 130230

A minimalist approach pack, or a streamlined ascent pack, the Alpinisto 38 LT has enough space for long days, with the configurability to match the task at hand. Lightweight materials and durable aluminum hardware give you confidence to move fast in the Alpine.

SPECS: (SM/MD)

VOLUME	WEIGHT	STRIPPED WEIGHT
38 L	1.03 g	630 g

MAX CARRY 15.9 kg • MAIN ACCESS Top loader

# ALPINISTO

A day in the alpine backcountry is one of winter's greatest rewards. Trusting the skills and tools that get you there and back is equally crucial. That's why our approach with the ski series is one of steady refinement rather than wholesale redesign. By making gradual advances and improvements in materials and design, we make every generation of these award-winning packs lighter, stronger, and easier to use in bad conditions while improving their riding performance for the best days.

## FEATURES

- › Removable bivy pad
- › Full length side access zipper with locking sliders and separating top skirt provide uninhibited access to main pack contents
- › Compressible over-sized crampon pocket with reinforced puncture and tear resistant abrasion zones
- › Floating top lids for capacity expansion and rope carry
- › Dual top-lid collar design for easy helmet storage
- › Dual tool attachment config has two separate attachment systems that work with any ice axe design from any era
- › Reinforced, over-sized A-frame ski carry attachment system for fat skis and split boards
- › Rope strap and three-point haul loops
- › Gear loops and ice clipper loops on hipbelt
- › Glove friendly hardware and single, anodized aluminum hook for maximum durability on main top lid closure
- › Security pocket under top lid with key clip
- › Top lid occipital cutout for enhanced helmet clearance
- › Dual layered reinforced bottom panels for enhanced abrasion resistance
- › Single wand pocket
- › Hydration tube routing and tube management to both shoulder harnesses

## SUSPENSION

# FUSION FLEX

Fusion Flex is a lightweight, robust suspension system designed for harsh alpine environments. Its tubular 7001 aluminum perimeter frame and perforated HDPE frame sheet provide crucial load support and optimal torsional flexibility while the climbing-specific hipbelt and harness maintain comfort for technical ascents. Fusion Flex combines crucial load management, and simple, durable design to offer climbers the ideal alpine-minimalist pack suspension system. Combined with its lightweight, reinforced perimeter frame a cross-stay prevents barreling after hasty packing efforts in harsh weather. Meanwhile, the snow-shedding backpanel resists moisture absorption, and removable padding in the high-cut, harness-compatible hipbelt allows for maximum weight reduction without the loss of support. Tapered, dual-density shoulder and lumbar padding maintain mobility and proper load transfer over waterproof layers.

### » TORSIONAL FLEX LOAD SUPPORT

with tubular 7001 aluminum perimeter frame, cross stay and lightweight framesheet.

### » HIGH-CUT HIPBELT AND TAPERED DUAL DENSITY FOAM

maximize comfort and freedom of movement.

### » THERMO-FORMED, SNOW-SHEDDING BACKPANEL

fits snug against back.

### » REMOVABLE FRAMESHEET AND PERIMETER FRAME

for lightweight ascents.

### » REMOVABLE HIPBELT SYSTEM

allows 38mm stability belt to remain in place after belt is removed.

THE ALPINE

## ALPINISTO 35

MD 86994 LG 86993

The Alpinisto 35 brings the same features as the Alpinisto 50 in a smaller, lighter format. Lightweight abrasion-resistant fabrics and reinforced construction give you peace of mind while you're beating your gear senseless. A strippable design with removable floating lid, frame, framesheet, and hipbelt makes light-and-fast ascents lighter and faster. Dual hybrid ice tool attachments and an oversized crampon pocket keep bulky gear secure, and a full-length locking side zipper offers total access to the top-loading main compartment.

SPECS: (SIZE MD/LG)

VOLUME	WEIGHT	STRIPPED WEIGHT
35 L	1.53 kg	.964 kg

- MAIN ACCESS Top & Side Access
- MAX CARRY 20 kg

Zest Orange -6096

Lichen Green -6059

### MATERIALS

**BODY** 210D HIGH TENACITY NYLON / 630D HIGH DENSITY NYLON  
**BASE** 630D HIGH DENSITY NYLON / 210D NYLON REINFORCEMENT LAYER  
**LINING** 135D HIGH DENSITY 40% RECYCLED POLYESTER WITH PFC-FREE DWR  
**HARNES/ HIPBELT/ LUMBAR** MULTI-DENSITY, COMFORTZONE LIFESPAN EVA  
**CHASSIS SUPPORT** 7001 TUBULAR ALUMINUM, HDPE FRAMESHEET

## ALPINISTO 50

MD 86997 LG 86996

Lighter, tougher, and more technical than ever, the Alpinisto 50 brings the best in materials, features, and construction for demanding alpine situations. Its top-loading design also offers full side zipper access with a split-top skirt design, an oversized reinforced front panel crampon pocket, and a removable lid compartment for smaller items. A lightweight alloy perimeter frame supports heavy gear loads, or strips out along with the removable hipbelt and framesheet for ultralight missions.

SPECS: (SIZE MD/LG)

VOLUME	WEIGHT	STRIPPED WEIGHT
50 L	1.60 kg	1.01 kg

- MAIN ACCESS Top & Side Access
- MAX CARRY 23 kg

# TARGHEE

A day in the alpine backcountry is one of winter's greatest rewards. Trusting the skills and tools that get you there and back is equally crucial. That's why our approach with the Targhee series is one of steady refinement rather than wholesale redesign. By making gradual advances and improvements in materials and design, we make every generation of these award-winning packs lighter, stronger, and easier to use in bad conditions while improving their riding performance for the best days.

## FEATURES

- » Front panel with high abrasion resistant fabric for durability
- » Anodized aluminum hooks for easy durable use in the cold
- » Backpanel zippered main volume entry
- » Top zippered goggle and accessory pocket
- » Perimeter frame for ultra-stable load carry and torsional flexibility
- » Diagonal front ski carry and front snowboard and snowshoe carry
- » A-frame ski and splitboard carry with heavy duty bottom loops
- » Front quick-access zippered avalanche safety pocket with tool organization
- » Compression molded snow-shedding backpanel
- » Lightweight, durable bungee ice tool system with aluminum toggles and pick sleeve
- » Glove friendly top compression buckles with camming action for reliable hold
- » Deployable, adjustable helmet carry stores in front zippered pocket
- » Internal hydration sleeve with routing to Insulated Shoulder strap sleeve
- » Safety whistle integrated into sternum strap buckle
- » Dual layered bottom panels for added durability

## SUSPENSION

## VERTFLEX

VertFlex suspension meets the needs of skiers and riders who require vertical stability for heavy loads, while maintaining torsional flexibility. Utilizing an alloy perimeter frame for support, the Targhee packs round out their superior carry through a flexitble framesheet panel and an anti barrelling cross stay. With an improved, snowshedding backpanel design, the VertFlex suspension on the Targhee is optimized for committed missions into the backcountry.

» **Perimeter Alloy Frame:**

Designed to find the perfect balance between stability and flexibility, the perimeter frame design allows for torsional flexibility, while maintaining the ability to carry a full day's kit.

» **Snow Shedding Backpanel:**

Specially designed ridges in the thermo-formed backpanel prevent snow build-up and provide protection from the gear inside.

» **Insulated hydration Routing:**

Built in hydration routing comes in the form of an insulated zippered sleeve to reduce the chances that your hose will freeze up in colder temperatures.

» **U-Zip Backpanel Access:**

Extra-large access through the backpanel for unloading and loading gear when you're knee deep in powder. Custom ring pullers make for smooth access with gloves.

## TARGHEE 26

### ONE SIZE 121125

The compact and capable Targhee 26 is ideal for dawn patrols, short day tours, and lift-accessed gated terrain. A flexible HDPE framesheet provides support for light loads, while updated materials and organization offer bombproof durability and intuitive access to gear and snow tools in any conditions.

### SPECS: (ONE SIZE)

VOLUME	WEIGHT
26 L	1.23 kg

MAX CARRY 15.9 kg ▪ MAIN ACCESS Backpanel

# TARGHEE FASTTRACK

ALPINE & SKI

---

Designed to keep you moving in the alpine, the Targhee FastTrack (FT) features lightweight durable materials with all the weight-reducing strip-ability found in our alpine products. The Targhee FT includes a revolutionary quick carry system for stowing your skis on the go without removing your pack. Specialized aluminum hardware and split-top draw cord opening create the ultimate fast-paced alpine touring pack.

## FASTTRACK SKI CARRY

GAME-CHANGING SKI-CARRY WITHOUT REMOVING THE PACK USING THE CUSTOM FASTTRACK FRICTION HOOK SYSTEM

## LIGHTWEIGHT MODE

STRIP OFF THE HIPBELTS, TOP POCKET, AND FRAME SHEET TO TRANSFORM INTO A MINIMALIST ALPINE TOURING PACK

## ALUMINUM HARDWARE

SPECIALLY DESIGNED ALUMINUM HARDWARE FOR A COLD-WEATHER DURABILITY AND GLOVE-FRIENDLY FUNCTIONALITY

## FEATURES

- › FastTrack carry system to attach skis without removing the pack
- › Reinforced, coated webbing loop and elasticized webbing for ski attachment with custom FastTrack hook
- › Front quick access avalanche tool pocket with secure probe and handle sleeves
- › Deployable helmet carry system with adjustable hook attachment
- › Floating top pocket with zippered security pocket on the underside and quick release hardware for convenient strippability
- › Removable and linkable hipbelt pads with gear loops and zippered pocket, plus completely removable hipbelt webbing
- › Fusion Lite suspension with removable HDPE framesheet and thermoformed, snow shedding backpanel
- › Low-profile tapered harness with removable sternum strap featuring integrated safety whistle
- › Front ice tool attachment with durable aluminum toggle system and protected pick sleeve
- › Full-length side access zipper with locking sliders and separating top skirt provide uninhibited access to main pack contents.
- › Side compression with side release buckle closure on top
- › Top compression rope strap and large quick-pull drawstring opening
- › Interior hydration sleeve with universal secure buckle hanger system and hydration port
- › Front webbing daisy chain
- › Custom comfort-grip molded zipper pulls and glove friendly hardware
- › Double layered bottom panel for added durability

## MATERIALS

**PACK BODY** 100D HIGH DENSITY NYLON  
**PACK BOTTOM** 210D HIGH DENSITY NYLON  
**LINING** 135D HIGH DENSITY 40% RECYCLED POLYESTER WITH PFC-FREE DWR  
**SUSPENSION** MULTI-DENSITY LIFESPAN EVA FOAM, 7001 TUBULAR ALUMINUM, HDPE FRAMESHEET

## SUSPENSION

## FUSION LITE

The Fusion Lite suspension and the Targhee FastTrack are designed to work for you. Configure the pack based on your objective.

A removable frame and hipbelt pads convert this lightweight pack into a minimalist touring pack. Re-fit the hip-pads and you have a pack ready to attach your skis in a flash and begin your final push.

#### » LOW-PROFILE HARNESS WITH FASTTRACK HOOK

The tapered, low profile harness designed with the custom FastTrack hook to quickly stow your skis without removing your pack.

#### » REMOVABLE SUPPORT FRAME

Strippable padded framesheet with integrated aluminum frame and cross-stay so you don't feel the edges of gear through your pack.

#### » SNOW SHEDDING BACKPANEL

The unique faceted design of the thermoformed backpanel prevents snow build up and protects your back from gear.

#### » REMOVABLE HIPBELT PADS

The removable hipbelt pads can be anchored to the pack for more stable load carry, or can slide along the hipbelt webbing to accommodate a harness and gear.

**SLING  
WRAP  
SECURE**

**>> FASTTRACK SKI CARRY SYSTEM:**

Game-changing ski-carry using the custom FastTrack friction hook system. Derived from randonee racing, the FastTrack system allows you to stow skis without taking off your pack.

Simply sling the tails through the bottom loop, wrap the reinforced, elasticized top strap, pull over your shoulder and lock into the shoulder-mounted hook - all while wearing your pack.

## TARGHEE FASTTRACK 24

S/M 139320 M/L 139431

The Targhee FastTrack 24 is designed to make quick work of the transition from uphill to harvesting pow. The FastTrack ski carry system allows you to stow skis without removing your pack, and securely stores essentials ensuring you're equipped for multiple laps before your first meeting.

VOLUME	WEIGHT	STRIPPED WEIGHT
24 L	1.20 kg	.82 kg

MAX CARRY 15.8 kg • MAIN ACCESS Panel Loader

Gold Winner

## TARGHEE FASTTRACK 35

S/M 132706 M/L 132707

Start early, keep moving, cover vertical. The Targhee FastTrack 35 is engineered to keep pace in the alpine while you focus on your objective. Lightweight, removable components allow you to dial in your level of support and trim weight, while the FastTrack ski carry system allows you to stow skis without removing the pack.

VOLUME	WEIGHT	STRIPPED WEIGHT
35 L	1.36 kg	.82 kg

MAX CARRY 15.8 kg • MAIN ACCESS Top Loader

## TARGHEE FASTTRACK 45

S/M 132708 M/L 132709

The Targhee FastTrack 45 gives you the capacity for long days in a package that wants to keep moving. The FastTrack ski carry system gives you the ability to attach skis to the pack without removing it, and the removable components make for a customizable pack engineered for maximum efficiency in the alpine.

VOLUME	WEIGHT	STRIPPED WEIGHT
45 L	1.41 kg	.86 kg

MAX CARRY 20.4 kg • MAIN ACCESS Top Loader

# WEAR IT DON'T CARRY IT

If there's one thing we could leave you with, it's this: Don't size your pack like your tee shirt, size it like your shoes.

A well-fitted pack allows you to stay comfortable and use less energy on the trail. It also allows you to use your pack correctly and to fill it to its maximum capacity. Both of these things help you get optimal performance and enjoyment not only out of your pack, but also out of yourself and your trip—and that's what we want for all of our customers.

## STEP 1: MEASURE YOUR TORSO LENGTH

### C7 VERTEBRA TO ILIAC CENTER

Grab a measuring tape. Tilt your head forward to make it easier to and find the highest protruding knob at the base of your neck. Ahoy! It's your C7 vertebrae—the starting point for your soft measuring tape. Tilt your head back up and run the tape straight down your spine until you reach your Iliac Center. This is the point in the center of your spine that aligns with the highest point on your hipbone.

## STEP 2: PICK YOUR PACK!

Once you know your torso length, you can find out which size you should buy in whichever Gregory pack you like. And remember, all Gregory packs are sized the same regardless of gender, so a medium is a medium whether it's unisex, a men's pack, or a women's pack.

## STEP 1: MEASURE YOUR TORSO LENGTH

We always recommend throwing at least 5-10 kg in the pack. From there, the most important thing you can do is make sure the top edge of hipbelt is sitting 2 cm above your iliac crest shelf. Next, the shoulder straps should wrap smoothly over your shoulders and should start wrapping onto your back, about 8 cm below the top of your shoulders. If your shoulder strap starts lower than 8 cm, try a larger size.

Top of hipbelt  
1" above your  
iliac crest

### Hipbelt

This is the belt you buckle across your hips, and it allows you to carry the weight of your pack on your hips instead of your shoulders. You should position the belt pad 2 cm above your iliac crest.

Wrapping about  
3" below the top  
of your shoulders

### Shoulder Strap

Yes, these are the straps by which you carry your pack. They should form to the contours of your natural shape and rest completely against your shoulders, wrapping about 8 cm below the top of your shoulder blade.

### Sternum Strap

This is the strap that buckles directly over your chest, at about heart-height used to keep the shoulder straps in place and correctly positioned on your body. This strap should not distort the shape of the shoulder strap or inhibit your breathing.

Adjust to shift  
weight between  
shoulders & hips

### Load Lifter Strap

Critical and often underutilized, these straps connect the shoulder strap to the top support structure of the pack. They draw the weight of the pack towards your center of gravity to provide stability and energy savings and allow you to shift weight from your upper body to your hips.

2. Tighten  
1. Loosen  
Weight to hips

### Transfer Weight to Hipbelt

By loosening the shoulder straps slightly then tightening the load lifter straps on the top of the shoulder strap, you are taking weight supported by the shoulder straps and transferring it to your hipbelt.

1. Loosen  
2. Tighten  
Weight to shoulders

### Transfer Weight to Shoulder Straps

By loosening the load lifter straps on the top of the shoulder strap and then tightening the shoulder strap adjustment, you are taking weight supported by your hipbelt and moving it to your shoulder straps.

### Pack Sizing – One Size

This is the belt you buckle across your hips, and it allows you to carry the weight of your pack on your hips instead of your shoulders. You should position the belt pad 2 cm above your iliac crest.

### Pack Sizing – Adjustable

Yes, these are the straps by which you carry your pack. They should form to the contours of your natural shape and rest completely against your shoulders, wrapping about 8 cm below the top of your shoulder blade.

### Pack Sizing – Custom Fit

This is the strap that buckles directly over your chest, at about heart-height used to keep the shoulder straps in place and correctly positioned on your body. This strap should not distort the shape of the shoulder strap or inhibit your breathing.

# GO TO MARKET CAMPAIGN

Whether you're hitting up your favorite National Park or hanging at the park with your crew, our packs are built to power your experiences, no matter what they are.

Our Make:Time campaign supports all of our major product categories:

**ON-TRAIL TECHNICAL  
ADVENTURE TRAVEL  
OUTDOOR LIFESTYLE**

**MAKE:TIME**  
*TO RECONNECT*

**GREGORY**  
GREGORYPACKS.COM

**MAKE TIME WITH THE KATMAI & KALMIA**  
Sometimes we need to disconnect from the daily grind to reconnect with each other and the outdoors. With a ventilated suspension and customized fit, the Katmai and Kalmia match your movement so you can hit the trail in ultimate comfort and go that extra mile.

We know now more than ever the importance of community, time and connection. Our Spring 2022 Make:Time campaign focuses on remembering the simple things in life. Making time for seasonal changes, road trips, foliage, local travel, experiences, fresh air, friends, family, exploration and so much more. Together we can all make MORE time for the world we live in and those who share it with us.

As always, we welcome and encourage our dealers to tap into our Make:Time creative assets and use them as tools to better connect with your community.

# RETAIL SUPPORT

## POINT OF SALE TOOLS

Snag some high-quality POS for your shop: from banners to stuffer bags to B-Chairs, we've got you covered. Hit up your rep if you need anything additional or have stellar ideas for new tools.

## PRODUCT SEEDING

Have a standout employee or local influencer who loves Gregory? We'd love to hook them up with a new pack! Hit up your rep to snag one or if your gear locker needs stocking.

## EMPLOYEE TRAINING

Along with our dedicated product and fit clinics in-store, we have created a brandbook and special clinic videos for shop employees. Staff are given the opportunity to learn more about our brand and new products, as well as get access to pro discounts.

## ASSET SHARING

All the amazing assets we create and share live in one, easy-to-locate database:

- World-class photography assets for social media, website ad and event use
- Product education videos for every collection we build
- Dynamic social media videos and assets
- Reach out to us in order to get access to our database where all these amazing assets are located

# ACTIONS NOT WORDS

## OUR APPROACH

At Gregory, we realize sustainability is a journey, not a destination. And it turns out this journey is not so different than our product development process. With innovation, risk taking and forward thinking, we are continually improving our products and reducing our carbon footprint.

### 3 PILLARS OF FOCUS:

- 1. INNOVATIVE PRODUCTS
- 2. CARBON ACTION
- 3. THRIVING SUPPLY CHAIN

# SUSTAINABILITY

## 1. INNOVATIVE PRODUCTS

Explore new materials and production methods and find the right balance of performance, durability, style and sustainability. Be mindful and clever with our approach to new product solutions.

PRODUCT LIFECYCLE <>  
MATERIALS INNOVATION

### ✔ PRODUCT CARBON FOOTPRINT

More and more collections incl. all S22 novelties are using recycled main materials, which reduces the overall carbon footprint of the products strongly relative to our conventional virgin nylon construction.

### ✔ RECYCLED PET WATER BOTTLE PACK LINER

We custom developed a 40% post-consumer recycled PET polyester pack liner material to replace our virgin nylon pack liner material in 99% of our products. This has diverted 1,632,960 plastic bottles per year from landfills.

### ✔ REACH COMPLIANCE

100% of our products now meet the European-focused REACH regulatory standards. REACH compliance requires rigorous chemicals testing for each and every product and is designed to eliminate hazardous chemicals. It is the strictest law to date regulating chemical substances.

### ✔ PFC-FREE DWR

Since we started to apply PFC-free DWR as 1st step on all our S21 novelties we have transitioned all our backpacks incl. S22 packs to PFC-free DWR.

## 2. CARBON ACTION

Reduce the carbon footprint of our operations by using energy more efficiently and looking for more ways to reduce our emissions. Targeted action where we can make a meaningful impact.

INCREASING EFFICIENCY <>  
REDUCING EMISSIONS

### ✔ SHIPPING REDUCTIONS

Overhauled our shipping carton sizes and built new box shapes for key collections, resulting in a 21% improvement in shipping efficiency and a substantial reduction in freight related carbon footprint.

### ✔ FACILITY BASELINE

We completed a comprehensive carbon footprint analysis of Scope 1 and Scope 2 emissions for all our facilities (direct and indirect emissions created by our office spaces and owned facilities) to understand our facility footprint and hold ourselves accountable to continuous improvements. Company-wide we saw a 3 percent decrease in our 2018 global GHG footprint when compared to 2017.

### ✔ OUR HOME

We built our primary design headquarters in an amazing neighborhood in Holladay, Utah, just south of Salt Lake City directly at the base of the world class Wasatch Mountain playground. We chose a mixed living area that reduces commute times, provides great walkability to local restaurants and shops, and space to store our bikes and skis in the office. We installed 100% LED lighting, showers, cold filtered water taps, and all the standard recycling efforts you'd expect to see and we have more planned for the future as our office grows and expands.

## 3. THRIVING SUPPLY CHAIN

Continue to make sure we look after the people and communities where we work and encouraging good practice and positive impacts beyond our direct business.

RESPECTING HUMAN RIGHTS <>  
RESPONSIBLE SOURCING

### ✔ REDUCED PACKAGING FOOTPRINT

1) Our new S'20 3D Hydro Gen II hydration reservoir and accessories are now constructed from 100% recycled craft paper. 2) Custom developed a biodegradable polyethylene air bag in place of a cardboard tube in our Deva & Baltoro packaging, preventing 7,850 pounds of cardboard from entering a landfill each year.

### ✔ BLUESIGN HARDWARE

95% of all hardware and buckles have been converted to Bluesign approved parts. This means all our plastic buckles and hardware are all Bluesign sourced.

### ✔ GREGORY LIFETIME GUARANTEE

Same incredible lifetime guarantee we've had since 1996 is still in place today and helps extend the lifespan of products to the max. The connection our customer build with our products is also something we value and respect, so we want to keep them on the trail together as long as possible.

### ✔ PRODUCT IMPACT

Just like packs, our mentality is if it doesn't exist, build it yourself. We partnered with an industry leading Lifecycle Analysis firm in Germany to build a customized Lifecycle Analysis tool specifically designed to measure the true impact of the packs we build.

# SUSTAINABILITY

## NUMBERS THAT MAKE SENSE

### ► S21 Katmai/Kalmia Carbon Footprint Reduction

Kalmia 50/  
Katmai 55  
REDUCED  
**28%** <sup>CO<sup>2</sup></sup>

Kalmia 60/  
Katmai 65  
REDUCED  
**30%** <sup>CO<sup>2</sup></sup>

### ▼ Katmai 65/Kalmia 60 reduction info that will be shown on hangtags

All fabrics on this bag are made from recycled content resulting in a 28% reduction in the carbon footprint when compared to a conventional nylon pack.

**30%**

Offset the remaining carbon footprint of this product by choosing to walk, bike or hitch a ride for 89 miles instead of driving. This effort will offset the remaining carbon footprint of this pack.

CARBON FOOTPRINT EQUIVALENCE

**= 89** DRIVEN MILES  
116 KM

- ▲ Branding on pack
- ▲ Footprint reduction and offset info will be shown on hangtags for Katmai & Kalmia

# WARRANTY

## LIFETIME GUARANTEE

We build our products to last a lifetime and that's how long we stand behind them. We guarantee that this product will be free from defects in workmanship and materials for as long as you own it.

---

## QUALITY-FIRST MENTALITY

Since 1977, Gregory packs, bags and adventure travel gear have earned an unmatched reputation for quality and reliability. Premium and uncompromised raw materials, construction, and design are ingrained in our brand culture and our history. To this day, our quality-first mentality is an important part of how we define and differentiate ourselves.

## ACTIONS, NOT WORDS

Great life experiences are the end game; they're why we do what we do at Gregory, and we know the quality of your experience often depends on the quality of your gear. That's why we don't build products to last a season or two—we build them to provide you with a lifetime of enjoyment. In 1996, we put our money where our mouth is and launched the Gregory Lifetime Guarantee. This guarantee is still in place today and is included with any product you purchase from us. This state of mind drives our design process, empowers our commitment to repairability, and ultimately produces higher performance products that deliver on a longer-than-average lifespan.

NEW HANGTAG HIGHLIGHTS LIFETIME GUARANTEE AT POINT OF SALE

We've been helping you get outside for almost 40 years, by building uncompromised product that gets you and your gear to wherever you're going. We believe the outdoor experience is enhanced when you have incredibly comfortable, intelligently designed, premium quality equipment you can trust without question.

We are relentless about this simple, but also very challenging product creation philosophy, because we know that getting out—whether to scale a mountain peak or pedal across town—is paramount to our quality of life. We feel like anything and everything we love to do is simply better when we do it outside. So above all else, we do not compromise on the time we spend under open skies with our compadres in life, and the products we build are a direct result of this philosophy.
